COLLEGE OBJECTIVES

Within the context of the UC-VMGO, the college offers relevant programs that aim to mould well-rounded computing professionals by forging strong industry partnerships and maintaining a pool of competent and motivated faculty and staff.

The college is committed to foster a teaching-learning environment whose faculty and students can:

a) Develop computing solutions independently or in a team-oriented setting, based on internationally-recognized standards, for the promotion of moral, social, cultural, and environmental interests;

b) Adapt to the demands of the industry in terms of technical, personal, interpersonal, communications and leadership skills;

c) Uphold the standards of professionalism, corporate conduct and ethical values;

d) Conduct intellectual, technological and relevant researches in the computing field;

e) Avail of appropriate institutional services and resources that complement with academic programs; and

f) Contribute to community-building through the responsible use of ICT resources and appropriate transfer of ICT skills.
